SBC *Enviro Bleach*

Another environmentally friendly product from SBC
Naturally Better!

As part of our green involvement *, SBC now offers pre-finished shingles with Enviro Bleach stain, **EXCLUSIVE** to SBC.

In today's world of stricter environmental regulations, oil based finishes are increasingly being replaced by more environmentally friendly products. For this reason, and because of our position as the **QUALITY** leader in the white cedar industry, SBC has teamed up with a major worldwide stain manufacturer to develop Enviro Bleach stain.

Enviro Bleach is a unique green formulation that replicates the look and performance of comparable oil based stains with the features and benefits of an **ENVIRONMENTALLY FRIENDLY** finish.

ENVIRO BLEACH PROPERTIES

- Excellent protection for wood while producing a uniform natural gray appearance at application
- Specially formulated to provide natural weathered look after only a few months of exposure
- Wide-spectrum fungicide/mildewcide solution that protects against wood destroying fungi, mildew, and blue stain
- Meets the most strict VOC rules (under 50g/L)

Our Enviro Bleach cedar shingles are kiln-dried and individually coated for maximum stain penetration and protection. Factory finishing in a controlled environment provides the finest finish available. Not only do Enviro Bleach SBC cedar shingles save time and money, but also give instant curb appeal to any project.

Due to the unique formulation of the finish, and the renewable and recyclable nature of real wood, our Enviro Bleach shingles are the right choice for a greener environment.

Warranty

30 Years Against Decay

Enviro Bleach contains pigments to provide an initial appeal, but is not considered a finish coating. A surface on which Enviro Bleach has been applied requires both sunlight and water to sustain the weathering process. Because of this, areas with greater exposure to sunlight will age more rapidly, where as the areas with less sunlight will tend to weather a little slower.

Where Quality Comes Naturally!

SBC

*When Only the Best Will Do,
Specify SBC!*

THE SBC ADVANTAGES : Highest Quality Standards Ever

- Minimum 3 7/16" shingles width : 15% larger than industry standard
- Graded on both faces : Only manufacturer to do this
- R&R precision 1/64" to 10" : Truest R&R shingles on the market
- Kiln-dried by dehumidification :
Producing shingles that are less brittle and susceptible to cracking
- Exclusive factory-stain « dipping » process :
Putting more stain where it counts, below the 5" exposure line

THE « EASY NAILING SYSTEM » Exclusive to SBC

- Embossed « nail line » into each shingle
to provide an instant visual
guide for fastener placement
- A quicker, easier and more precise
method of installing cedar shingles
